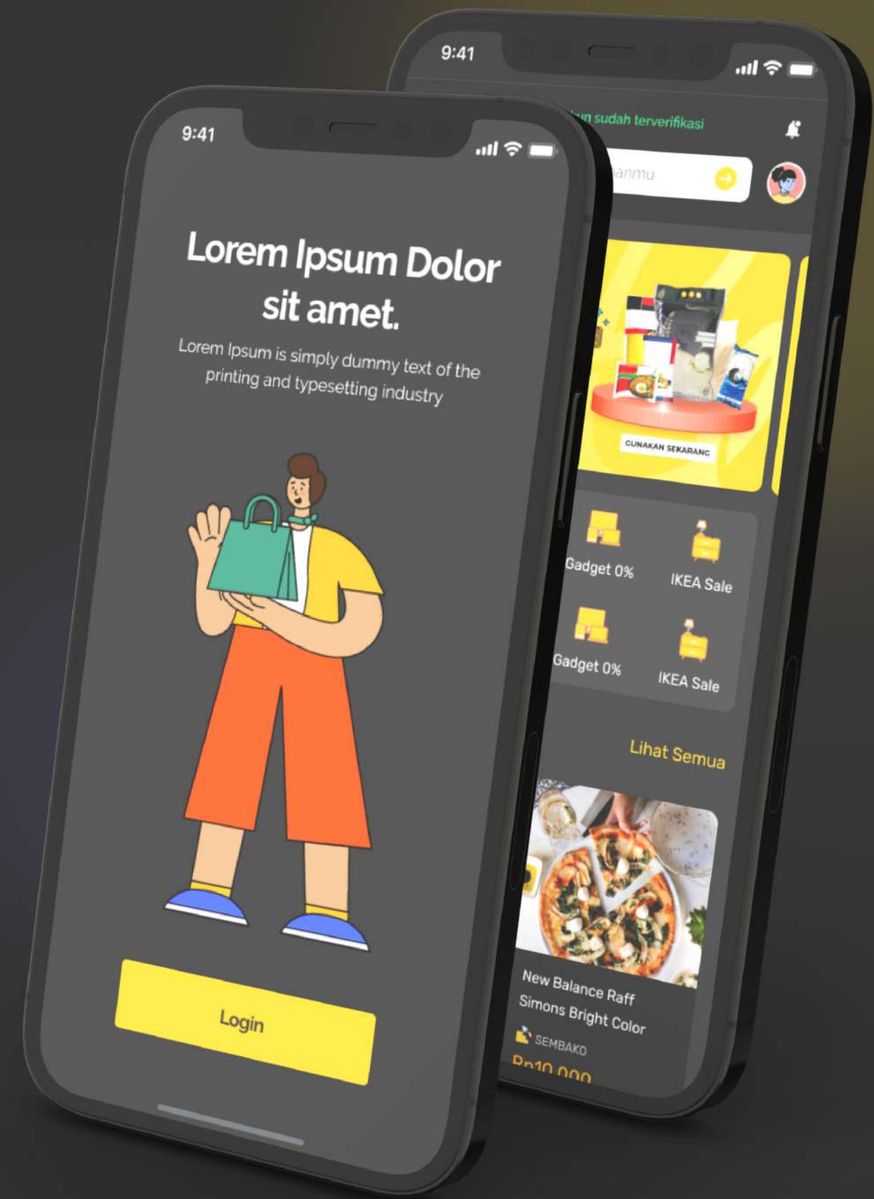
UI/UX CASE STUDY

Tripy App

Sparky Team

Discover Hidden Places in Egypt



Role

UI/UX Designer

INTRODUCTION

About This Project

Tripy is a mobile tourism application designed to help users discover both hidden and popular destinations across Egypt.

GET STARTED

Overview

Tripy is a mobile tourism application designed to help users discover both hidden and popular destinations across Egypt.
The platform allows travelers to explore new places, learn about their historical and cultural background, view real visitor reviews, and plan their trips easily.
In addition to discovering destinations, users can book local tour guides directly through the app, making their experience more organized and immersive.

Platforms

Android

IOS

The Story

Tripy creates a digital marketplace where local businesses such as restaurants, cafes, and tourist attractions can promote their services through advertisements, creating a sustainable revenue model for the platform.
The main goal is to build a trusted travel platform for discovering authentic experiences in Egypt.

PROBLEM

Travelers in Egypt struggle to find unique destinations. Most platforms focus on popular, generic experiences. This makes discovering and planning trips harder.

- Over reliance on popular tourist attractions
- Lack of content about hidden gems and local experiences
- Limited access to trusted, local recommendations
- Difficulty finding verified local tour guides
- Scattered information across multiple platforms
- Lack of an easy, end to end trip planning experience
- No centralized platform combining all these services

VS

SOLUTION

Tripy offers a single platform to simplify travel in Egypt.It connects discovery, planning, and booking in one place.This makes travel easier, faster, and more personalized.

- Discover hidden destinations across Egypt
- Access detailed descriptions and photos for each place
- Read authentic reviews from real visitors
- Get clear directions and travel information
- Book verified local tour guides easily
- Explore nearby restaurants and services
- Plan a complete, seamless travel experience

📍 Preparation

DESIGN PROCESS

Design Flow

1. Research & Ideation
2. Design & Prototype
3. Testing

Ideate
Turn idea from concept and brainstorm to MVP

Design
Sketch out the product to align the user needs

Develop
Convert the designs into a live application

Deploy
Launching the application to the market

Design Timeline

Our achievement in the journey depicted in numbers

- Edge cases Prototype
- Usability Testing
- Gather Feedback
- Design Revision

05 Development

- Handoff to developer
- Assets Documentation
- Translate from UI to code
- Unit Testing
- UI audit
- Gather Feedback
- Layout Revision after feedback
- Ready to test

Testing -> Release

- Testcase Creation
- Flow Creation from QA
- QA documentation
- UI Audit
- Revision to developer
- General Testing
- Release MVP

My Role

As a UI/UX designer, I make sure that my designs are well received by users, and can be implemented by developers.

UI Documentation

creation of ui documentation so that developers can code well.

Provide Assets

ensure Assets contained in the UI are usable and provide in multiple sizes.

User testing

User testing using UT and AB testing, so that the App can be well received by the user.

UI Audit

Perform UI audits. make sure nothing goes wrong when the App is made.

Flow Documentation

when the application is continued, it can be easily carried out.

Research

This process is made so that the requirements and problems obtained meet the target market.

Design Strategy

Tripy delivers a seamless travel experience by combining discovery, planning, and booking in one platform. It helps users explore hidden destinations, connect with local guides, and plan tripy The goal is to simplify travel while making it more authentic and personalized.

Intention

“ Creating a simple and engaging platform for travelers in Egypt to explore beyond popular destinations.
Enable users to discover hidden gems, access real reviews, and connect with trusted local guides.
Support users in planning complete trips from discovery to booking in one place.

Intention to detail transaction

Target User

“ Travelers in Egypt (locals & tourists)
Age: 20–45
Interested in unique experiences, not just popular spots
Prefer using mobile apps for planning trips Seek trusted recommendations and easy planning tools

Personas

Tech Constraint

“ Mobile-first platform (Android / iOS)
Internet connectivity may be unstable in remote areas
Need for lightweight performance and fast loading
Map and location accuracy challenges

Constraint

General task

“
- Discover hidden destinations
- View place details
- Read and write reviews
- Book local tour guides
- Explore nearby services
- Save and organize trips
- Plan complete travel experiences

Feature and Task

Success Factor

“
- Easy and intuitive user experience
- Increased discovery of hidden places
- Reduced time to plan a trip
- Positive user feedback and satisfaction
- Repeat usage of the platform
- Successful bookings of local guides
- High user engagement (reviews, saves)

Measurement

📍 Preparation

USER RESEARCH

Research Plan

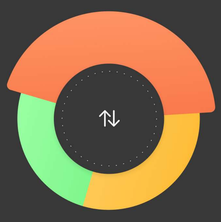
- Survey
- Interview
- Personas
- Empathy Map
- User Journey

To better understand user needs, travel behavior was analyzed through interviews and travel platform reviews.

SURVEY

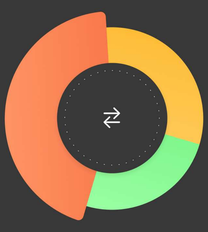
I did survey with **75 potential users** in combination with interviews from individual conversation to know their **views, experience** and to collect **quantitive and qualitative data**. the target audience were between the age 20-45 Yold

> What is the biggest problem you face when searching for a new place?



- Limited or inaccurate information
- Difficulty finding different places
- Lack of trust in recommendations

> What makes you trust and try a place for the first time?

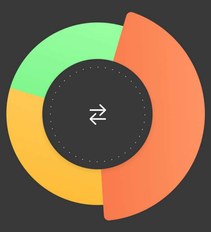


- Real user experiences
- Reviews
- Authentic photos.

> What kind of mood are you looking for when going out?

- Calm
- Adventure
- Family friendly

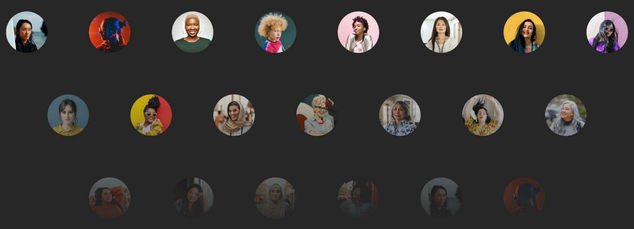
> What type of places do you most enjoy visiting?



- A mix of both
- Hidden gems
- Well known places

INTERVIEW

From the survey that I have done, I did filtering, and got 10 people for direct interview. I did online interviews using Zoom and invited them at different times.



Mariam Ashraf
Content Creator

I discover most places through Instagram, but I wish there was an app that shows hidden gems with real photos and honest reviews.

Ahmed Farouk
Digital Marketer

I'm always looking for new places to explore on weekends, but I usually end up going to the same popular spots because I don't know where else to go.

Nour Tarek
Graphic Designer

I care a lot about the vibe of the place. Photos and reviews really help me decide if it's worth visiting or not.

Omar Hany
University Student

I don't like overplanning, but I still need basic info like how to get there and what to expect before I go anywhere.

Laila Nabil
Photographer

I'm always searching for unique and aesthetic locations for photoshoots, not just the typical tourist places.

Salma Khaled
Traveler BLogger

Sometimes I find amazing places, but I struggle to explain the full experience without a local guide who knows the story behind it.

Statement
A busy traveler seeking simple, reliable trip planning

About

Ahmed is a working professional who enjoys traveling as a way to disconnect from his busy routine. He prefers well-planned trips where he can explore new and unique places, especially those that are less crowded and more authentic. Although he relies on his phone to plan his trips, he often finds the process time-consuming and scattered across multiple platforms.

Behaviors

- Plans trips ahead due to limited time
- Uses mobile apps to research destinations
- Prefers recommendations over random searching
- Values convenience and efficiency

Goals

- Discover unique and less crowded destinations
- Plan trips efficiently with minimal effort
- Experience authentic places beyond typical tourist spots
- Make the most out of his limited free time

Frustations

- Most platforms focus only on well-known locations
- Planning requires using multiple apps and sources
- Lack of reliable and structured information
- Difficulty finding trustworthy local guides

Empathy Map

To better understand Ahmed's behavior and mindset while planning trips, I mapped out his thoughts, feelings, and actions.
This helped uncover key pain points and opportunities to improve his overall travel experience."

What does he Think & feel

Am I wasting time on places that aren't worth visiting?

Why is planning a trip so complicated?

I want to feel confident about my choices

I want my trip to be smooth and enjoyable.

Advice from friends and family about where to go

Numerous travel platforms with inconsistent information

I hope I discover something new and exciting.

Travel blogs and influencers recommending places

Can I trust these reviews?

Social media posts showing popular destinations

What does he Hear

Reviews and ratings on different platforms

Local guides sharing insider tips

Stories from other travelers about unique experiences

What does he See

Hidden gems that are hard to find

Conflicting recommendations from friends and influencers

Ads and promotions highlighting mainstream spots

What does he Say and Do

searches Google and social media for destinations

uses multiple apps to plan a single trip

"I want something reliable, not random recommendations checks reviews before making decisions.

saves places but rarely organizes them properly

I want something reliable, not random recommendations checks reviews before making decisions.

Gain

- Discovering unique and authentic places
- Saving time and effort in planning
- Feeling confident about travel decisions
- Having a smooth, enjoyable travel experience

Pain

- Too many platforms needed to plan one trip
- Lack of trustworthy and structured information
- Difficulty discovering hidden places
- Hard to find reliable local guides
